Magnetic pad Slim 320 x 100 mm/ Magnetic pad Big 320 x 245 mm

Maximum order, uncompromising paint protection, and tools always at hand – horizontally and vertically.

In the modern workshop, body shop, and mobile assembly, every second counts. Dropped screws, lost small parts, or scratches on the customer's paintwork cost time, money, and nerves. Our professional magnetic mats offer the perfect solution: equipped with ultra-strong magnets and a gentle, leather-like soft surface, they keep tools and components securely in place – even on angled surfaces or vertical walls. Available in two perfectly matched sizes, they offer maximum flexibility for every workspace and edge.

Applications:

Bodywork & Service: Ideal for placement on narrow fender edges or in tight engine bays.

Mobile Trade: Thanks to its slim format, it fits perfectly into any toolbox or side pocket.

Workshop Organisation: The perfect addition to the narrow side panels of your tool trolley or MOBILIO system.
