PRO LINE Bit box with mini ratchet wrench 1/4” S2 , 27 pcs.

The Ultimate Bit Box for Every Job.

Introducing the professional-grade 27-piece bit box with a mini ratchet wrench with 72 teeth, engineered for exceptional performance. Our bits are made from premium S2 steel, a material renowned for its superior hardness and strength. The CNC-machined heads guarantee a precise fit in the screw, significantly reducing cam-out (the tendency for the bit to slip out of the screw head) and preventing damage. For enhanced control and grip, each bit has a sand-blasted finish.

This kit is designed for life on the move. The robust, shock-resistant casing protects your tools from impacts, and its incredibly compact size means you can easily carry it in your pocket or toolbox. With the included mini ratchet wrench, you can tackle tight spaces and difficult angles with ease.
