Bit box with precision screwdriver 1/4", 45 pcs.

The 45-Piece Precision Screwdriver Set: Your Masterpiece for Delicate Work.

Precision that inspires! This 45-piece precision screwdriver set is the ultimate companion for every fine mechanic, hobbyist, and DIY enthusiast. Whether it's repairing smartphones, laptops, cameras, drones, or other delicate devices, this set provides the perfect solution for every screw, no matter how small.

The bits are made of high-quality chrome vanadium steel (CrV). This material is known for its superior hardness and resistance to wear, which guarantees a long service life and reliable performance. The bit holder is ergonomically designed for comfortable handling, and the integrated extension allows you to reach even hard-to-access places.

Extensive Equipment for Maximum Versatility
The core of the set consists of 35 precisely manufactured bits measuring 4x28 mm, covering a wide range of screw drives:

- Slotted (SL): In seven sizes from 1.0 to 4.0 mm, ideal for classic slotted screws.

- Phillips (PH & PZ): In the common sizes from PH000 to PH1 and PZ00 to PZ1, essential for most electronic devices.

- Torx (TX): From T4 to T20—covers the most frequent Torx requirements in electronics.

- Hex (HEX): From H0.7 to H4, perfect for small set screws and hex screws.

- Special bits: The set also includes the special Pentalobe 0.8 and 1.2 mm bits and Tri-Wing (Y) 00 and 0 bits, which are often used in Nintendo consoles, household appliances, and other special applications.

Additionally, 7 nut driver bits in sizes from 2.5 to 5.5 mm are included, which are ideal for small nuts and hex screws.

Practical Accessories for More Convenience:

- 1 Precision Bit Holder: For optimal control and a secure grip on the bits.
- 1 x 120 mm Flexible Shaft: A flexible magnetic extension that allows you to screw around corners and into tight, cramped spaces where rigid tools fail.
- 1 x 120 mm Magnetic Holder: Securely holds the bits and screws in place, making it significantly easier to work in confined areas.
