LED headlamp COB 500 with motion sensor

COB 500 LED headlamp with motion sensor, rechargeable

Experience maximum flexibility with the rechargeable COB 500 LED headlamp. Its motion sensor ensures effortless on/off control. But the COB 500 offers even more: the lamp head can be rotated 360°, and the lamp itself is detachable, quickly transforming it into a practical work light. Thanks to USB-C, it's also fast and convenient to recharge. The COB 500—the ideal lighting solution for any situation!.

Specifications:
- 2–4 hours of operation
- 2.5 hours charging time
- Beam angle of 100°
- 3.7 V / 1400 mAh Li-Po battery
- 120/250 lux (1 m)
- 200/500 lumens
- 6400 Kelvin
- IP44 protection class for splash water, dust, and dirt
- IK07 impact resistance rating

Included in delivery:
USB-C cable

Optimizations to Phase Out headlamp 702.003.000

- Significantly Higher Brightness: With 200 - 500 lumens and 120 - 250 lux (at 1m), this headlamp provides noticeably better illumination in the dark

- Modern USB-C Charging Port: The headlamp is equipped with a modern USB-C charging port for convenience.

- Increased Impact Resistance (IK07): Thanks to its enhanced IK07 impact resistance rating, the headlamp is now exceptionally robust and durable against external forces. It reliably withstands shocks and drops

- Improved Headband: The headband has been completely redesigned. It is now made of a higher-quality material that provides more comfortable wear and increased durability.

- Multilingual Support: User-friendliness has been improved with broader language support. The detailed user manual is now available in five languages: German, English, French, Italian, and Spanish.

- Clearer Packaging Design: Both the packaging and the display packaging have been redesigned. The front is labeled in the three main languages (German, English, and French), while the back covers all five languages. Important features are also shown with clear pictograms, making the handling more intuitive.
